

MeerKATHI (P10.40)

Developing an end-to-end data reduction pipeline for MeerKAT and other radio telescopes

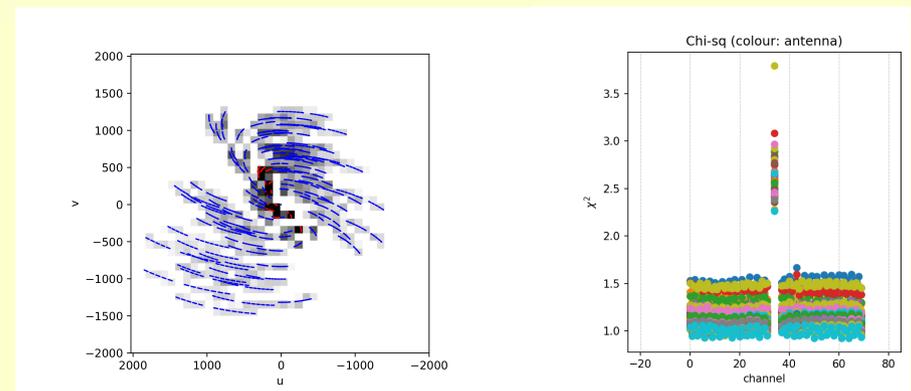

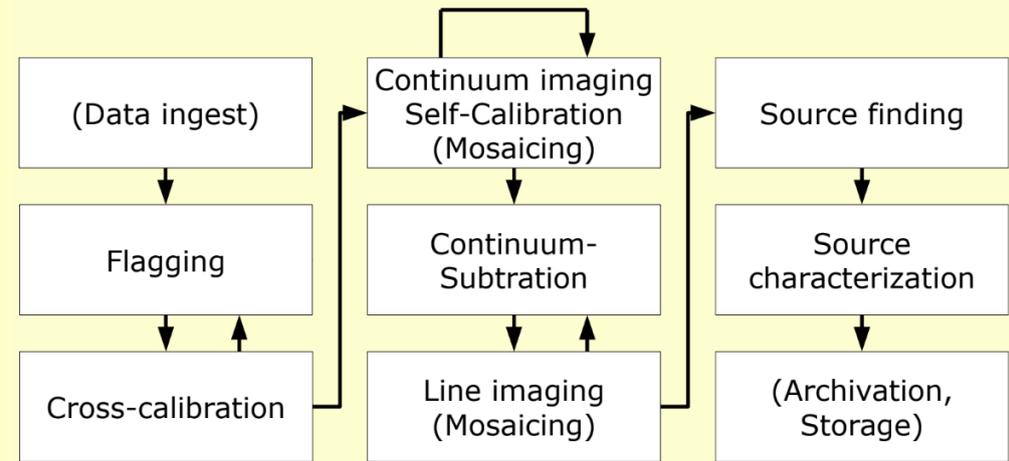

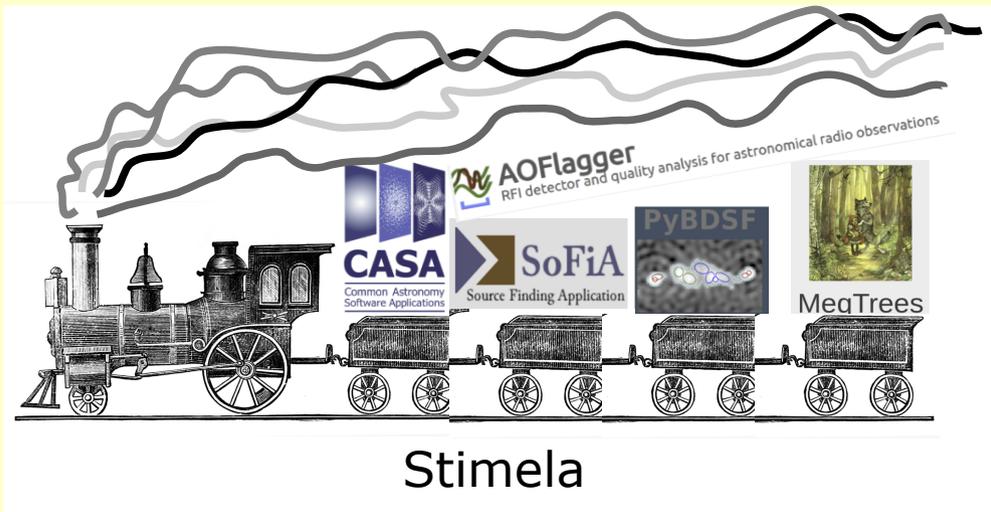

The MeerKATHI collaboration

G. I. G. Józsa^{1,2,3} (at this conference), S. V. White², K. Thorat^{2,1,4}, O. M. Smirnov^{2,1}, P. Serra⁵, Mpati Ramatsoku^{2,5}, A. J. T. Ramaila¹, S. Perkins¹, D. Molnár⁵, S. Makhathini², F. M. Maccagni⁵, D. Kleiner⁵, P. Kamphuis⁶, B. V. Hugo^{1,2}, W. J. G. de Blok^{7,8,9}, L. A. L. Andati²

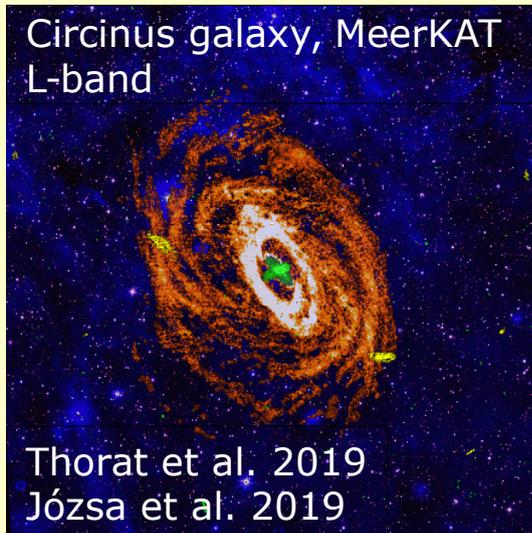

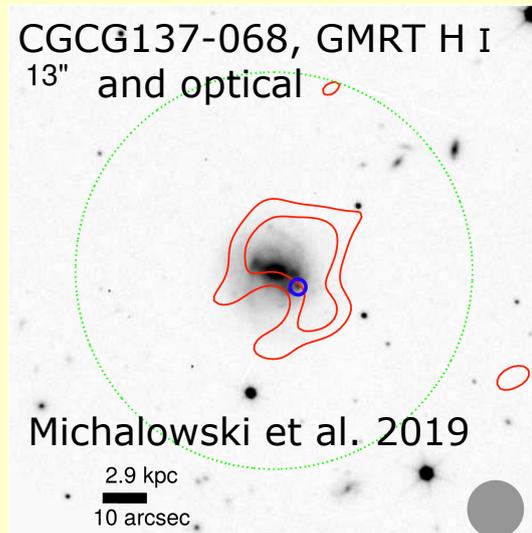

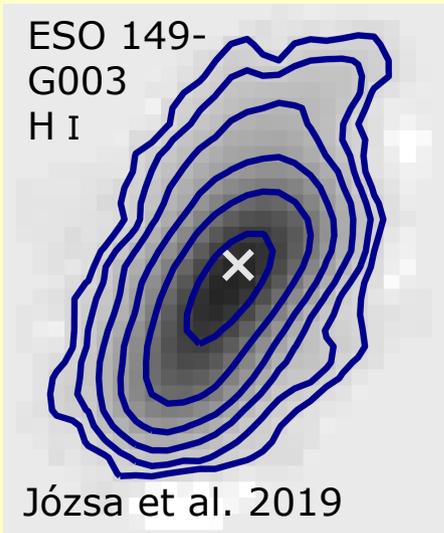

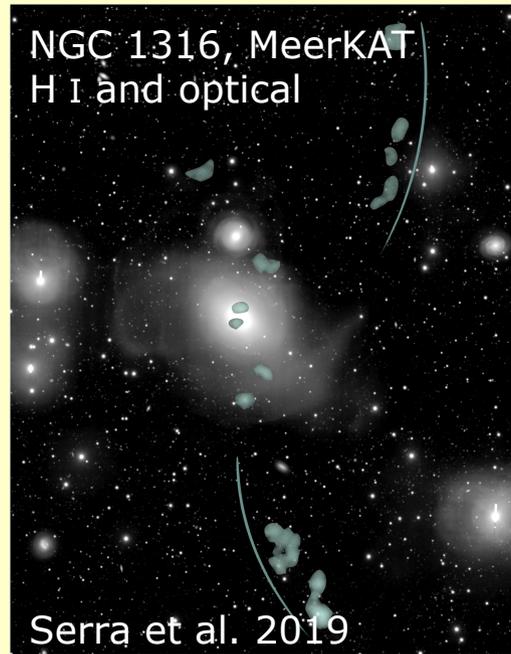

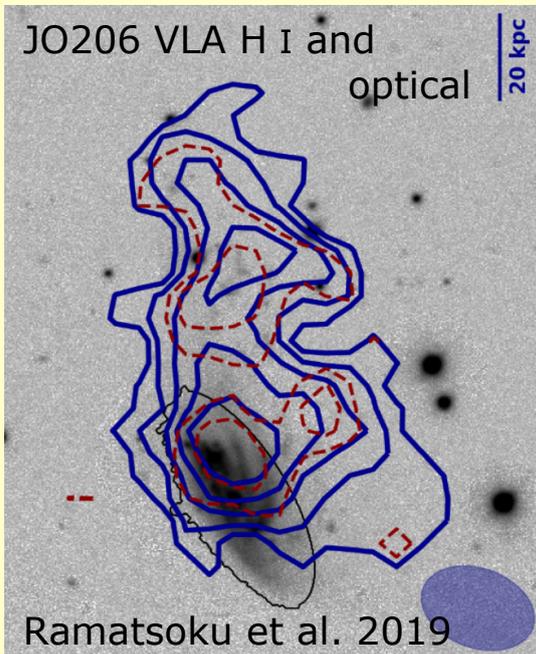

Architecture and work flow (P10.40)

- Python
- Stimela (Makhathini et al.)
 - Standardized access to a large suite of software packages (WSClean, CASA, ...)
 - Containerization (universal access through Podman, Docker, uDocker, Singularity)
- Purpose-tailored software
- Quality assessment

Proof of pudding (P10.40)

Becoming public this year

Talk to Josh at this conference: jozsa@ska.ac.za

Or later to MKTHI: meerkathi@googlegroups.com
